

Ficus & Seasonals
Collection 2021

Plantanious B.V. is proud to be nominated for the Horticulture Entrepreneur Prize 2020.

WE ARE PLANTANIOUS

Surprisingly green

Plantanious is a dynamic, innovative and sustainable horticultural company specialising in the cultivation of houseplants and flowering seasonal products. Not only do we grow plants in our own 4.5ha greenhouse in the South Holland region of Westland, we also benefit from fair and long-term partnerships locally and abroad. This allows us to cultivate a broad assortment of many different and surprising products for the market. And we never stand still for a moment! We are constantly searching for new and surprising products and trends to make life more pleasant.

One green turn deserves another

Plantanious is more than just a company: it is also a vision. Because at Plantanious, we act and think green. For example, we heat our greenhouses with geothermal energy, and we supply our own electricity needs with a huge array of solar panels. We are justifiably proud of our CO2 reduction, which means we can make our products even greener than they already are!

Family concern

Plantanious is built on the foundation of Kwekerij Loek Jansen, a family concern that has been a pioneer in the cultivation of houseplants and flowering seasonal products for three generations. In the past twenty years we have specialised in cultivating Ficus and container plants. Plantanious is run by the twin brothers Joost and Freek Jansen, entrepreneurs with a unique, clear vision and a heart and passion for green. Their mission: grow the company and let it flourish while realising a green, healthy world.

Meet the Limonium Salt Lake®
This year's winner of the golden pearl
(the award for very special plants).

The salt crystals covering the leaves of
the Salt Lake® attract many butterflies
and other friendly pollinators. The
cultivation of the Limonium also has
a low energy impact and therefore
contributes to the sustainable,
environmentally friendly character of
Salt Lake®.
